

**MADISON STRATEGIC SECTOR PREMIUM FUND (MSP) AND MADISON COVERED CALL AND EQUITY STRATEGY FUND (MCN) DECLARE QUARTERLY DIVIDENDS**

Madison, Wisconsin – June 3, 2013. The Madison Strategic Sector Premium Fund (NYSE:MSP) declares its quarterly dividend of \$0.26/share and the Madison Covered Call and Equity Strategy Fund (NYSE:MCN) declares its quarterly dividend of \$0.18/share. The dividends will be payable June 28, 2013 to shareholders of record on June 18, 2013. The ex-dividend dates will be June 14, 2013. If it is determined that a notification is required pursuant to Section 19(a) of the Investment Company Act of 1940, as amended, such notice will be posted to the funds' respective website after the close of business three business days before the payable date. If a distribution rate is largely comprised of sources other than income, it may not reflect fund performance.

At this time the funds are also notifying shareholders that their Boards approved the unification of fund investment strategy among all funds managed by Madison Asset Management, LLC with covered call strategies with regard to investments in foreign securities. Specially, MSP and MCN may each invest up to 15% in foreign securities. Foreign securities are defined as securities that are: (i) issued by companies organized outside the U.S. or whose principal operations are outside the U.S., or issued by foreign governments or their agencies or instrumentalities ("foreign issuers"); (ii) principally traded outside of the U.S.; and (iii) quoted or denominated in a foreign currency ("non-dollar securities").

Each fund's objective is to achieve a high level of current income and current capital gains, with long-term capital appreciation as a secondary objective. Both funds intend to pursue their objectives by investing in a portfolio of common stocks and utilizing an option strategy, primarily by writing (selling) covered call options on a substantial portion of the common stocks in their portfolios in order to generate current income and gains from option writing premiums and, to a lesser extent, from dividends. Market action can impact dividend issuance as significant decreases or increases in the funds' total assets affect the funds future dividend prospects.
