Performance data shown represents past performance. Investment returns and principal value will fluctuate, so that fund shares, when redeemed, may be worth more or less than the original cost. Past performance does not guarantee future results and current performance may be lower or higher than the performance data shown. Visit [madisonfunds.com](http://madisonfunds.com) or call 800.877.6089 to obtain performance data current to the most recent month-end.

## Sector Allocation (%)

Figures are rounded to the nearest 0.1% and may not total 100%.

<sup>1</sup> Growth of \$10,000 is calculated at NAV and assumes all dividends and capital gain distributions were reinvested. It does not take into account sales charges (if applicable) or the effect of taxes.

<sup>2</sup> Average annual total returns and calendar year returns assume all distributions are reinvested and reflect applicable fees and expenses. Class Y shares do not impose an up-front sales charge or a CDSC.

Indices are unmanaged. An investor cannot invest directly in an index. They are shown for illustrative purposes only, and do not represent the performance of any specific investment. Index returns do not include any expenses, fees or sales charges, which would lower performance.

There can be no assurance the Fund will achieve its investment objective. The Fund may invest in large cap, mid cap, foreign or emerging market equities which are subject to market volatility. Equity risk is the risk that securities held by the Fund will fluctuate in value due to general market or economic conditions, perceptions regarding the industries in which the issuers of securities held by the portfolio participate, and the particular circumstances and performance of particular companies whose securities the portfolio holds. In addition, while broad market measures of common stocks have historically generated higher average returns than fixed income securities, common stocks have also experienced significantly more volatility in those returns.

The Fund follows a sustainable investment approach by investing in companies that embed sustainability in their overall strategy and demonstrate adherence to sustainable business practices. In pursuing such a strategy, the Fund may forgo opportunities to gain exposure to certain companies, industries or sectors, and may be overweight or underweight in certain industries or sectors relative to its benchmark index, which may cause the Fund’s performance to be more or less sensitive to developments affecting those sectors. In addition, since sustainable investing takes into consideration factors beyond traditional financial analysis, the investment opportunities for the Fund may be limited at times. Sustainability related information provided by issuers and third parties, upon which the portfolio managers may rely, continues to develop, and may be incomplete, inaccurate, use different methodologies, or be applied differently across companies and industries. Madison’s framework of sustainable investing will vary from other managers. Further, the regulatory landscape for sustainable investing in the United States is still developing and future rules and regulations may require the Fund to modify or alter its investment process. Similarly, government policies incentivizing companies to engage in sustainable practices may fall out of favor, which could potentially limit the Fund’s investment universe. There is also a risk that the companies identified through the investment process may fail to adhere to sustainable business practices, which may result in the Fund selling a security when it might otherwise be disadvantageous to do so.
